

Competition Management System

Genius Sports provides football leagues and federations with a highly efficient system to digitally manage all football competitions.

Our partners can:

- Fully automate the management of any league or knockout competition format
- Manage admin functions such as fixture allocation and team line-up generation from one easy-to-use system
- Track and record disciplinary information such as number of cards per season for teams and players
- Publish all competition info to official websites, mobile apps and third party partners.

The system is fully integrated with our live data collection, website, mobile app and social media services, ensuring official data is efficiently synchronised across all league digital platforms.
