API

Genius Sports is a true partner to sport.

We believe that sports of all sizes should benefit from best of breed technology across performance, broadcast, digital and more.

Where required, we will work closely with your partners to deliver official data to third party applications via our robust API.

Our existing partners use our API to power:

- Broadcast and OTT graphics
- Video editing technology (highlight clips and performance analysis)
- Official fantasy football games
- Performance data analytics
- Third party mobile apps and websites.
